Welcome to the 2015 American College of Cardiology Puerto Rico Chapter 26th Annual Scientific Sessions and 9th Annual CV Team Member Convention!

Crafted by our Scientific Committee, this year’s 8 educational tracks go from the core and essentials to new trends and innovations. Our “Valve Summit” will go in-depth on the diagnosis and contemporary management of both aortic and mitral valve disease. We are for the first time including a track on Geriatric Cardiology, which has become increasingly relevant. Among many stellar lectures, we will also host ACC President-Elect Dr. Richard A. Chazal for the ACC PRESIDENTIAL ADDRESS. Furthermore, we brought back favorites like the panel Q&A format, the interactive ECG session, and the Fellow-in-Training case presentation competition with clinician judges.

Our Exhibit Hall and social events will continue to facilitate learning and networking with friends, colleagues and guest faculty. During the three daily breaks, I encourage all to spend time at the exhibits and learn all about the new and exciting trends in diagnostics and therapeutics. We are also extending the popular “Meet & Greet-Cocktails at the Exhibits” to both Friday and Saturday afternoons at the end of the sessions. On Friday May 1st, our traditional alfresco casual Welcome Dinner is open to all attendees. On Saturday May 2nd, ACCPR members and guests are invited to attend the ACC Member & Faculty Gala Dinner and join us as we recognize Dr. Edgardo Hernandez as our 2015 Distinguished Citizen.

My thanks to the ACCPR Chapter board members, our staff, the Scientific Committee led by Dr. Juan Carlos Sotomonte, and the CV Team Associates, led by Dr. Abigail Matos, for their year-long organizing effort. I thank our local and guest faculty for taking the time to share their knowledge and expertise, and our session moderators for their essential role. Thanks to our industry and hospital sponsors who make our meeting possible. My special thanks also go to the ACC organization for supporting this event, especially through the participation of Dr. Richard A. Chazal, President-Elect, and once again, the CardioSmart delegation. Finally, I thank all attendees because your support makes it possible for our Chapter to continue to bring home the extraordinary talent it takes to build this high caliber event.

Have a wonderful meeting!

Orlando Rodriguez-Vila, MD, MMS, FACC
Governor and President, Puerto Rico Chapter American College of Cardiology

DISTINGUISHED CITIZEN AWARD

Edgardo Hernández-López, MD, FACC

The Puerto Rico Chapter of the American College of Cardiology honors Dr. Edgardo Hernández-López with the 2015 Distinguished Citizen Award.

Born in Camuy, Puerto Rico, Dr. Hernández obtained a bachelor degree from the University of Puerto Rico, Rio Piedras, and a Medical Doctor Degree at the University of Granada, Spain. He moved back to Puerto Rico and completed Internal Medicine training at the VA Hospital in San Juan, followed by fellowship training in Cardiovascular Diseases at Baylor College of Medicine.

After training, he returned to the VA Caribbean Healthcare System (VACHS) as staff in the Medical Service. A mentor for medical students, residents, and cardiology fellows, he became Chief of Cardiology and Cardiovascular Diseases Program Director, a position he held for 15 years. In that capacity, he contributed to the training of hundreds of Internal Medicine residents and 54 cardiologists who today serve in both practice and academia in Puerto Rico and abroad. During his tenure, he ensured the uninterrupted ACGME accreditation of the training program and its enhancement with the establishment of Cardiac Surgery and Interventional Cardiology programs, and rose to the rank of Professor of Medicine at the University of Puerto Rico.

At the ACC Puerto Rico Chapter, Dr. Hernández was an active member and served as President and Governor from 1996-1998. During that time at the ACC, he endeavored to improve cardiovascular education and research. He similarly made important contributions to the educational agenda of the Puerto Rico Society of Cardiology. Upon retiring from the VA, he became Medical Director of the Cardiovascular Center of Puerto Rico, where he continued to make meaningful contributions.

Dr. Hernández is husband to his loving Marilyn, father of Edgardo, Eduardo, and Enrique, and grandfather of 7 children, while he continues to enjoy golf and life-long medical learning. We are honored to recognize Dr. Edgardo Hernández-López as our Distinguished Citizen and thank him for directly and indirectly touching the lives of thousands of patients.
FACULTY

Federico M Asch, MD, FACC
Associate Director, Cardiovascular Core Laboratories
Director, Cardiac Imaging Research
MedStar Cardiovascular Research Network
Medstar Health Research Institute at Washington Hospital Center
Assistant Professor of Medicine (Cardiology), Georgetown University Washington, DC

Blase Carabello, MD, FACC
Chair of Cardiology
Mount Sinai Beth Israel
Medical Director of the Heart Valve Center
The Mount Sinai Hospital
New York, NY

**ACCREDITATION**

**Sponsorship Statement (Joint)**
This activity is jointly sponsored by The Ponce School of Medicine and the ACC Puerto Rico Chapter.

**Acknowledgment of commercial support**
This activity is supported by an educational grant from:
1. Boston Scientific
2. Medtronic

**Accreditation Statement**
This activity has been planned and implemented in accordance with the Essential Areas and Policies of the Accreditation Council for Continuing Medical Education through the joint sponsorship of The Ponce School of Medicine and the ACC Puerto Rico Chapter. The Ponce School of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians. The Ponce School of Medicine is accredited by the Puerto Rico Board of Licensing and Medical Disciplines with the provider No. 016-Dc17-JLDM.

**Credit Designation**
The Ponce School of Medicine was submitted this live activity for a maximum of 12 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

**Faculty Disclosure Policy**
It is the policy of Ponce School of Medicine to ensure independence, balance, objectivity, scientific rigor and integrity in all of its sponsored educational activities.
All persons who are in a position to control the educational content of a sponsored activity are expected to disclose to the participants any relevant financial relationship(s) they and/or spouse/partner have with the commercial supporters and/or providers of commercial services and/or manufacturers of any commercial products discussed during the educational activity. All conflicts of interest have been identified and resolved prior to the release of this activity.

The faculty will report financial relationships or relationships to products or devices they or their spouse/partner have with commercial interests related to the content of this CME activity.

**Target Audience**
This activity has been designed for Internists, cardiology fellows, cardiologists, interventional cardiologists, electrophysiologists, cardiovascular surgeons involved in the management of cardiovascular diseases and any other physicians interested in the cardiology field.

**Need Assessment**
The Puerto Rico Chapter of the ACC on its 25rd Annual Meeting is dedicated to provide the most updated information regarding the management of basic and complex cardiovascular diseases. A well-balanced scientific program has been developed emphasizing on application of current guidelines, existing and new technologies and developments for the management and prevention of cardiovascular disease. The program will meet the real educational needs of internist and cardiologist and cardiovascular surgeons.

**Objectives**
1. Bring physicians up to date in the new guidelines from the ACC/AHA on the management of several topics like valvular heart disease, geriatric cardiology and general prevention of cardiovascular disease
2. Understand the different presentations of congestive heart failure and review the current management and diagnostic strategies to differentiate the different types
3. Develop skills in clinical diagnosis and management of specific types of valvular heart disease.
4. Update our knowledge in adult congenital heart disease.
   Improve the transition of care from pediatric to adult cardiologist.
5. Review basic skills in the interpretation of complex electrocardiograms.
6. Discuss the relevance of the management of diabetes mellitus in what relates to cardiovascular diseases
7. Understand the importance of blood pressure control in patients with diabetes mellitus.
8. Review key concepts in the diagnosis and therapy of heart failure with reduced ejection fraction
9. Learn the appropriate timing and type of interventions available for patients with mitral valve disease
10. Discuss the novel approaches to diagnosis and markers in patients with acute coronary syndromes
11. Learn about population health aspects within the US territories
12. Update knowledge on current recommendations in lipid management.
13. Understand the role of a variety on new interventional treatments.
14. Update in the care of patients with atrial fibrillation.
15. Learn about the setup and role of the Heart Team in medical decision-making.

**Americans with Disabilities Act**
The Ponce School of Medicine and the ACC Puerto Rico Chapter fully comply with the legal requirements of the ADA and rules and regulations thereof. Please notify the ACC Puerto Rico Chapter if you have any special needs in the registration table.
Statement of Responsibility/Unlabeled Use Disclosure
This educational activity may contain discussion of published and/or investigational uses of agents that are not indicated by the FDA. The opinions or views expressed in this CME activity are those of the presenters and do not necessarily reflect the opinions or recommendations of their affiliated institutions, The Ponce School of Medicine, or the ACC Puerto Rico Chapter. Please refer to the official prescribing information for each product for discussion of approved indications, contraindications, and warnings.

Commercial Interest
The ACCME defines a “commercial interest” as any proprietary entity producing health care goods or services, consumed by, or used on, patients, with the exemption of non-profit or government organizations and non-health care related companies.

Financial relationships
Financial relationships are those relationships in which the individual benefits by receiving a salary, royalty, intellectual property rights, consulting fee, honoraria, ownership interest (e.g., stocks, stock options or other ownership interest, excluding diversified mutual funds), or other financial benefit. Financial benefits are usually associated with roles such as employment, management position, independent contractor (including contracted research), consulting, speaking and teaching, membership on advisory committees or review panels, board membership, and other activities from which remuneration is received, or expected. ACCME considers relationships of the person involved in the CME activity to include financial relationships of a spouse or partner.

Relevant financial relationships
ACCME focuses on financial relationships with commercial interests in the 12-month period proceeding the time that the individual is being asked to assume a role controlling content of the CME activity. ACCME has not set a minimal dollar amount for relationships to be significant. Inherent in any amount is the incentive to maintain or increase the value of the relationship. The ACCME defines “relevant” financial relationships as financial relationships in any amount occurring within the past 12 months that create a conflict of interest.

Conflict of Interest
Circumstances create a conflict of interest when an individual has an opportunity to affect CME content about products or services of a commercial interest with which he/she has a financial relationship.
